RETURN ON RATE BASE COMPUTATION

1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
3. Note: Do not include property held for future use or construction work in progress with utility plant in service. These are not rate base components.

2000 Analytical Review DWCCA-3870-PJL

Dear Ms. Repas:

The Public Service Commission staff has completed its analytical review of your 2000 annual report. The primary purpose of our analytical review is to detect possible accounting related errors and to identify significant fluctuations from prior year's data, which are not sufficiently explained in the footnotes of your annual report. Our review did not identify any such issues. You did a good job completing your annual report. We are closing the review of your 2000 annual report.

Thank you for your efforts in preparing your 2000 annual report. If you have any questions, please feel free to contact me at (608) 267-9198.

Sincerely,

Peter J. Leege
Financial Specialist
Division of Water, Compliance, and Consumer Affairs

Accountant's Compilation Report

I have compiled the accompanying prescribed Municipal Utility Annual Report of the Morrisonville Water and Sewer Utility for the year 2000. Nonfinancial statistical information was prepared by management.

My compilation was limited to presenting, in a form prescribed by the Wisconsin Public Service Commission, information that is the representation of management. I have not audited nor reviewed the accompanying Report, and do not express an opinion or other form of assurance on it.

The Municipal Utility Annual Report is presented in compliance with the requirements of the Wisconsin Public Service Commission. These requirements differ from generally accepted accounting principles. Accordingly, this report is not designed for those who are not informed about such differences
